It is amongst the key players in the ring gears industry globally. By leveraging long-term presence in tailor-made ring gears and long-standing relationships with OEMs and tier-1 suppliers to OEMs, the business has been able to develop a strong presence in the manufacturing of flexplates. RPAL is the sole domestic manufacturer of flexplates in India and catered to over 25% of the flexplates volume demand for PV domestic production in fiscal 2021. One of the critical components that sits on the Engine Flywheel and engages with the pinion of starter motor to crank the engine upon starting. Ring gear transfers starting torque from starter to engine crankshaft. Ring gears have a diversified industry presence and are typically used in passenger cars, trucks, tractors, earth moving equipment, marine engines, lawn movers and industrial/power generation.

Flexplate is an important part of the Powertrain in Automatic Transmission Vehicles. It acts as a coupling between Engine & Transmission and connects the output of engine to the input of a torque converter for transmitting power from Engine to Transmission. It also acts as dampener & avoid transfer of vibrations from Engine to Transmission. Flexplate along with Torque converter takes the place of the flywheel & clutch assembly, which is typically found in a conventional manual transmission setup.
